DATE STAMP

Subject: Disposal of Arsanilic Acid Waste at sea

This is in reference to your memo of February 9, and my telephone conversation today.

We have made arrangements to dispose of the 143 drums of waste at sea. We understand that you will arrange to deliver to Philadelphia. The following instructions should be placed on the bill of lading.

Consign to: Flomerca Line
S/S Quatzeltenango
Pier 98, South
Philadelphia, Pennsylvania

Notation on bill of lading: To be disposed of at sea beyond the 200 mile limit. Drum heads to be removed or pierced before discharged.

The S/S Quatzeltenango will sail on April 13, and the drums are not to be delivered to the pier earlier than April 11.

The ocean rate will be \$23. NT. Will you arrange to weigh a few drums to arrive at the actual weight, and then estimate the balance in order to get the total weight of the shipment.
